S. PIASECKI I SYNOWIE

Urban
rubbish bin

KAMET I
KAMET II

**Aesthetics
Durability**

Necessary for
maintaining street
cleanliness,
especially
in places with high
pedestrian traffic

* Due to the interesting
stylistics, the bins for rubbish
besides the basic function are
also a decorative element of
our surroundings.

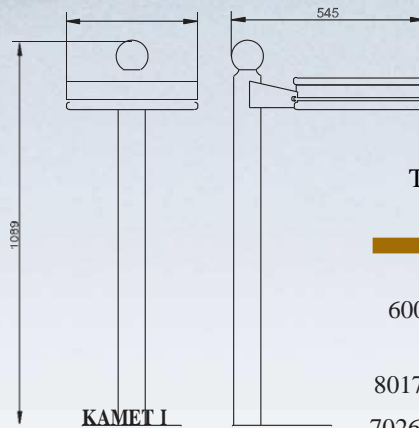

* Anti-corrosion protection
using the "duplex" method,
combining hot-dip
galvanizing and powder
coating, guarantees an
extremely long service life
without the need for
renovation.
