*Dear METALTECH Team,*

*Since the year 2015, CLAAS and METALTECH had a common interest to grow together and support our customers in the fields throughout the world.*

*The innovative approach and your capacity to cope to CLAAS often very specific requirements to improve the quality and the design of our machines structure especially for the tractor and balers activities shows that METALTECH is a strong partner for the future further development of our Machine portfolio.*

*As an example, your decision to develop your COBOT welding machine park fits perfectly to many of our weldment parts that bring on the same time robust and sustainable Quality and enough flexibility to cope on our specific requirement to sustain premium quality combined with low volumes and large range of parts variances.*

*In the name of the team , we would warmly thank you for your daily and strong implication to enable such cooperation.*

*Bests Regards*

*Stéphane Jacoby*
